

MIRTHE⁺ students win Poster Presentation Awards at the [4th International Workshop on Infrared Technologies](#) in Tempe, AZ, Nov. 8-9, 2017.

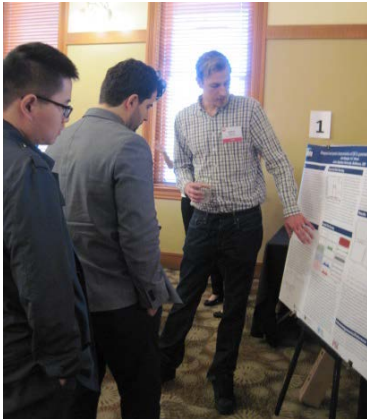

This workshop connected IR research and industry community to create conversation about industry challenges and breakthroughs; scientists and industry representatives shared thoughts, technical concepts, and scientific ideas. Congratulations to the winners and all poster presenters for their outstanding performance!

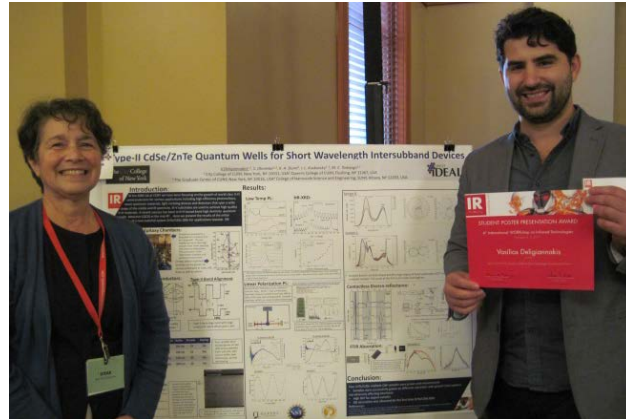

Alex Werth, a graduate student at Princeton University, (advisor Prof. Claire Gmachl) receives a Poster Presentation Award for her work on “Mid-Infrared Laser Spectroscopy for In Vivo Glucose Sensing in Interstitial Fluid”.

Michelle Zhang, a graduate student at Princeton University, (advisor Prof. Claire Gmachl) receives a Poster Award for her work on “Optoelectronic Response of Plasmonic Metamaterials with Quantum Cascade Structure”.

Nathan Henry, a graduate student at Johns Hopkins University, (advisor Prof. Jacob Khurgin) awarded for his work on “The Dynamics Behind QCLs Generating FCS Using Time-Domain Model Based on Modified Rate Equations”.

Vasilios Deligiannakis, a graduate student at City College of New York, (advisor Prof. Maria Tamargo) wins a poster presentation award for his work on “Type-II CdSe/ZnTe Quantum Wells for Short Wavelength Intersubband Devices”

Poster presenters during the Award Ceremony.
